OGALLALA, NE
PERMIT NO. 50**

This offering of bulls is different from what you have been seeing the past two decades. They will not fit everyone's breeding program. Most of our two year-old bulls and many of our yearling bulls are maternal bred bulls. This means they have been bred to produce replacement females and feed efficient steers. Maternally bred bulls will give you back feed efficient cows of the right size. We believe while breeding for only production traits the industry has lost its efficient mother cows. Why not run six 1,100 lb cows instead of four 1,600 lb cows? If you keep your own replacement heifers, consider the direction your current program is taking you. Do you need to down-size your cows? If you do, our bulls are what you have been wishing for.

OF 50 BULLS: 26 ARE CALVING EASE BULLS WITH BIRTH WEIGHT EPD= +2 LB. OR LESS
SPRING 2006 BULLS

Moderate frame size and maternal traits are the heart of this herd. Our experience shows the 1,050-1,150 lb. cow to be the most efficient. The foundation of our breeding program is based on moderate-sized cows. Are your cows 1,400-1,600 lb.? We have taken on the job of providing your next female sire. The mothers of many of these bulls weigh 1,050-1,200 lb. Their sons have the genetics to begin returning your herd to moderation.

**OUR GOAL IS A COW HERD THAT DOES IT ALL:
GROWTH, EFFICIENCY, MATERNAL TRAITS, AND CARCASS.**

For a catalog or more information call: Elton Tophoj

Cell: 308-778-6461 or Home: 308-772-3735.

6250 Road 183 • Oshkosh, NE 69154

You are welcome to view our bulls at the ranch anytime.
